Positive Economic Performance has Resulted in Improved International Perception...

Solid Upward Trend in Credit Ratings

Favorable Credit Rating Agency Perceptions

- Paraguay is one of the few Latin American countries with an overall optimistic outlook for 2016, based on:

*“Paraguay has demonstrated **improved capacity to manage external shocks** without destabilizing effects for external accounts or macroeconomic stability. **Adequate international reserves, increased exchange rate flexibility and improved credibility of monetary policy** allow Paraguay to absorb multiple external pressures...”*

-Fitch, 27 Jan-16

*“There are **ongoing positive developments in the realm of diversification**, particularly as they relate to **developing the maquila industry, raising the value-added of agriculture products, and upgrading infrastructure**. Fiscal metrics are favorable compared to both Ba and Baa peer medians, and recent efforts to contain current spending will create **room for capital and infrastructure spending to boost potential growth...**”*

-Moody's, 25 Sep-15

*“Paraguay has shown **increasing resilience to negative economic trends in the region...** expectation for prudent macroeconomic policy implementation, **continuous support for greater economic institutionalization** (for example, in the debt management office), and **gradual improvements in economic diversification** that could increasingly limit Paraguay's vulnerability to external shocks.”*

 - 61% of deployed funds have been used to improve Paraguay's infrastructure and energy sectors

...And a Clear Framework for New Projects

- Historically, Paraguay's infrastructure projects were funded with its own resources
- However, recent regulatory initiatives, such as the PPP Law, have been implemented to increase private sector participation in public works projects

PPP Law

- Law designed to encourage public-private associations for infrastructure projects
 - Private participants selection is held by a competitive procedure such as a public tender
- The program requires a concession contract per project with specific terms and conditions
- Each project will require a special purpose vehicle and shareholders will have to comply with equity contributions and structuring of financing, among other

...Leading to a Positive International Reputation

- Paraguay adheres to Article IV of IMF Standards for Data Dissemination
- IMF's press release regarding its 2016 mission to Paraguay in Feb-16 stated:

*"The authorities are moving forward with **welcome reforms to enhance financial supervision** (...) With the introduction and implementation of the Law of Free Access to Public Information, the **authorities have begun to establish much greater transparency in public processes to increase public accountability and strengthen governance**. This is an important step to **improve the quality of institutions in Paraguay on a lasting basis.**"*
